

## Product Features

With a solid outside finish unlike the ASPEN-40D, the VAIL-40S is a single-sided extrusion with a profile width of 40 mm (1.6 in.). The VAIL-40S is rigid because its backside has a longer metal edge for reinforcement, making it especially great for wall mounting and hanging overhead. Plus, it is lightweight; however, for widths longer than 4 ft., it is not recommended to be used as a free-standing display without a support because of its thin profile width. When installing the fabric graphic, the silicon beading can fit 12 mm (.47 in.) deep and 3 mm (.11 in.) wide into the silicone beading trough. Not compatible with lights (cannot be back-lit).

## Specs

### Specifications:

- 40 mm (1.6 in) wide aluminum profile
- Single-sided graphic display
- Accepts 12 mm keder

### Functions:

- Free standing display
- Wall mount display
- Suspended display

## Measurements

### 40S Frame Profile Side:

- 40 mm

### Linear Foot Weight:

- 4.5 oz

### Maximum Extrusion Length:

- 202 in

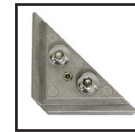

### Minimum Extrusion Length:

- 8 in

### Length For Splits / Cuts In Extrusions:

- 96 in Max
